Radiology Associates of Albuquerque @25

Radiology Associates of Albuquerque, a growing imaging practice, wanted to consolidate all of their locations into a 23,500sf space located in a large renovated warehouse building in the @25 complex in Albuquerque, New Mexico. The space is divided equally between clinical space and administrative space for the practice. The industrial feel of the space is enhanced by exposing the structure and duct work. Skylights are added strategically to bring natural light into the deep recesses of the existing warehouse.

The clinical space provides separate Women's Imaging Center and a General Radiation area, both accessible from the central lobby. The lobby is located on an existing 20-foot high wall of glass, which provides natural light throughout the lobby and adjacent public areas. The spaces are distinctly different in look and feel, with the Women's Imaging Center comfortable and engaging and the General Radiation area more high-tech. Technician areas are located central to each of the two practice areas with immediate access to the exam and treatment rooms. A back-of-house staff corridor connects the two areas.

The administrative area is located away from the clinical area due to limited public access. The work area is a large open office environment with high ceilings, exposed to the structure above with indirect lighting and skylights to provide natural light into this area. A large breakroom and boardroom is located in the administrative area. The two spaces can be combined by opening sliding glass doors for staff meetings and employee functions.

Location: Albuquerque, NM

Size: 23,500sf

Completion: June 2003
